XeonTeamCopy of what i posted on other founs... \*\*

\*1\* U know whan u start up rengaurd and sometimes it logs onto rengaurd in one of your names u didnt want to, well this app chages a few things and makes it so that the name u type in will be the name that rengaurd logsin with... so have fun.. READ THE INSTRUCTIONS... THEY ARE VERY IMPORTANT...\*

\*2\* Yeah, lol, it is kinda hard to explain... hmm, when u start up rengaurd, it connects u to the rengaurd network... usually as the last player to login on WOL. However if u didnt want to use the name rengaurd has logged in with, u sually haveto go all the way into WOL, login as the desired name, exit renegade, restart rengaurd... and then do the entire thing again.. What this does is illiminates most of this...

When u start game.exe u r propted with a screen, asking to for the name u want rengaurd to login with, rengaurd then uses this to login with and saves u from having to go into wol and then back out...

did that make any sence?\*

There u go... I posted it here... \*but crimson removed it\*

Crimson, do you plan on removing that link to a cheat site? Would be nice...
