LOL NO I DIDN'T LOL IT'S SO FUNNY BECAUSE I NEVER SAID THAT LOL!

Wow, I just watched that video and was so not impressed. It's got the same empty interior as the Refinery, barely any texture detail (WTF are warning stripes doing inside a barracks? Aren't you supposed to be safe inside the place you sleep, you retards?), and a few bunk beds. No visible light sources, and the EVA logo ripped off from Tom's website.

Then you get like two seconds of the exterior and you can tell that it looks like complete ass due to how the engine renders it.

Wonderful... I mean that in the worst way possible.
