BellSouth DSL

Get around 1200/220. 50 bucks a month.

It's really crappy because they built out their own backbone in the southeast recently. Before, I got a pretty straight shot to the UUNet backbone, but now it appears as though BS has stopped using UUNet altogether. Its made my pings skyrocket about 50-100 depending on which coast the server is on.

Tried to get Cyberconic DSL, they offer 1500/768 for 50 bucks a month, but don't offer it in SC.
