ok this has been happening for some time now!

at first i thought it was GSA but its not cause i tried to switch from using gsa to the all seeing eye program! and still getting the same shit!!!

when im in game i get kicked! not by ppl i just get disconnected. and ill go back into that server and about 5 mins. more or less will pass and it happens again. Well i have no other idea then, that its Rg. Its frankly piccing me off ROYALLY!!! i lose tanks and shit and cant play as of lately.

i tried going into different servers thinking it was that one server and thats also not the problem!!!!

and what pisseess me off more is that it picks and chooses when it fucking eant to act up!!!!!!!!!!!!
GRRRRRRR

and i know its not my internet service cause im not getting kicked fom msn messenger nor yahoo when this happenes. and i know its not like my picg or fps cause im usiall at 60 fps and thats max i have!!

very pissed and frustrated some one plz give me some freaking ideas!!!!!!!!!!!!!! how to stop this shit from happening!!!!!!!!!!!!!!
