I did a research project for school on the subject of oil a while ago...the most recent figure I found was that 17% of our oil imports came from Canada (our #1 import provider). Saudi Arabia was actually #3 on the list, at 8% (I forget what #2 was, and I lost the linkage). It was either the '03 or '04 report...I'm fairly certain I got it from the Dept. of Energy website, but it DID take some digging to locate.
