[23] Core Patch Pre-Check done
[23] There are errors. Disconnecting!
[23] Disconnected from RenGuard network

I just finished reinstalling everything.
I must have put something somewhere it shouldn't have been.

I have no idea as i've checked all the faqs helps etc..
I've run this for the last few years and I don't know what I've done to make Renguard hate me. lol.
If anyone has any helpful hints other than re-installing it would be appreciated. As I've done that
and yes correctly.

I must have something wrong in my data folder> Can't think of what though.
