Although I'm a religious man, I don't really trust this source. I haven't watched the movie completely.

Sentences like this is what made me wonder.

Quote: The Bible is the only holy book in the world that is scientifically accurate. In addition, scientific foreknowledge demonstrates that the Bible is truly the Word of God.

Shouldn't this topic be more for the Hot Topics.

Of Topic: Does anyone know where the quote button is. I had to manually type the quotes.
