Well that's a documentary on Creationism. There's no veiled favor for Creationism... lol You will not see an effective documentary. "The amazing world of Turtles" Starting with the line "Turtles are the most boring creatures on Earth and actually suck a lot..." It was meant to disprove some of the common "facts" about evolution, and try to get some people to beleive in Creationism again. OMG MCDONALDS ADS HAVE HIDDEN AGENDA! THEY WANT YOU TO EAT AT MCDONALDS!!! BRAEN WASHENG!!!!!!1!1!11
