1,000,000 x 2,000,000 = 2,000,000,000,000 volts?

That's a lot of power. Are you sure you've got the right number there?

On the topic of power, cool statistic - 10% of all humanity's produced power goes toward nitrogen fixation. Now, who can tell me what nitrogen fixation is used for?

EDIT: This new message board is getting on my nerves.
