AircraftkillerBecause it isn't high quality... That's why.

Could you please help me out....the client is stuck...similar to a lag/stuck where you keep rotating back to where you were.

And the harvy's arent following script...i think the scripts2.dll is the problem...the host can teleport,...but harvy wont move.

Im gonna double check the harvy script...prehaps thats the problem

Then again it works fine in 1 player LAN??
