Subject: Kickbanned my nickname
Posted by TD on Sun, 03 Jul 2005 12:21:24 GMT

So, there was a name exploiter that thought he was cool by hacking my nickname in our server, he kickbanned a clan member and I was watching from IRC.

Then, I immediately kickbanned him, good, he's gone. I unbanned the clan member.

But now, I cannot get in because my nickname is banned too, i can still get in with different names.

how do I manually add his IP to a banlist, and which file in which folder in the FTP..

I tried all banlist files, i also tried creating wolbanlist.

I tried:

name:ip on all those files (my ip, to test it on myself first), but it didnt kick me when i joined game, while my ip was in banlist.txt wolbanlist.txt and banlist.txt in Brenbot folder.

So, how do I manually ban him?
