Found this in another topic, might help.

Creed3020 wrote on Thu, 16 June 2005 19:45 The things mentioned in banlist.txt do not work. Your best bet is to find out their nickname and ip and add it to your wolbanlist.txt file. If that file does not exist, create it with notepad. The format is like this:

nickname:ipaddress

example

Ircheatr:67.115.208.35

or

Ircheater:\*. \*.\*.\*

or

\*:67.115.208.35

Good Luck!
