I'm looking to upgrade my motherboard to house all my new parts. My last few upgrades comprise of a motherboard and a processor.

I'm looking to spend between $70.00 to $120.00. Here is what I'm currently looking at:
http://www.msi.com.tw/program/products/mainboard/mbd/pro_mbd _detail.php?UID=496

I'm pretty sure I've decided on this motherboard but just seeking more oppinion to keep my options open.

Any suggestions?
