If you read the story more closely, you'll notice that the Japanese author of the story wrote the story from a standpoint that the entire issue was taboo... at one point he mentioned that it didn't seem possible, or something like that.

And the page which the story is being hosted on is <http://mdn.mainichi-msn.co.jp/> -- a website for Japanese national news written in English and hosted by MSN. There are no joke articles on their webpages. But if you want to read other interesting stories about Japanese perversion (and what it's like to live in a society where prostitution is legal and thriving), then browse through the "WaiWai" section (I researched the meaning of "WaiWai" and found it means "a gathering of people" so the "WaiWai" section is their section on people and social issues). There's a lot of surprising articles there.
