Dead 6 lives up to its name as being dead, so don't expect it out anytime within 10 years.

C4commando is lead by a retard from Europe called Seaman. I'm still wondering why he begged for artwork from Renegade in 2000, then squandered it to move on to another engine which he has no knowledge of or ability to support. Oh well, at least it's funny to watch D6 and C4 fail together.
