I'm currently using Deer Park Alpha. That's the only reason I got it. Firefox didn't really interest me. I like IE. I still like IE. As of now I just kinda flutter between them both. I don't really notice much of a difference between IE and this other than this doesn't display the centered YTMND's correctly. The only reason I decided to try it was the name lol... I couldn't resist a browser named Deer Park.
