Well... if you have RenGuard installed (or as shown in the images, you don't), you could always download <http://files.drkclan.com/index.php?action=file&id=2>

Heck, if you wanted to, you could even download that, install it to a different directory, then rename game2.exe to Game.exe and then overwrite your current game.exe file.

It's not missing, I can clearly see that, though it may be corrupt, that's why I suggested what I did above in this reply.
