In response to glyde's response:

Quote:but my oppion on this is that some things rape renegade like GodMode, Stealh Crates,etc

These make the game more interesting for people that care for them. You rape spelling. I'm not complaining.

Things like the random vehicles from crates, god crates, and stealth crates make Renegade less dependent on skill and teamwork, and more dependent on luck. Thank you, though, for pointing out that the people who like these mods... like these mods.

Quote:i know you can put them of but its getting anoying when you play and a fragger with a godmode walke throught you camp and blow 1 of your building up without getting killed by the towers.

OMFG DEY POONED TEH CAMPZOR!1!!! DEY WUNT TEH SMORZ!!1!

When he said "camp," he meant "base." And you're telling me you don't think it's pretty fucking stupid to have someone chosen at random who can so easily dominate the other team?

Quote:Wreckage are really sux right now. You cant blow up your own wrecks so the other team can walk right to it reapears it and get it into there base. Make is the other team impossible to rep wrecks of the other team.

So get your own repair gun you dumbass, you can make a wreckage come back to life. "FTW DEY CAN GET TEH VEHICKALZ BACK?!?!?!"

This is an especially good suggestion, because if your team left a wreckage near--or, god forbid, in--the opposing team's base, they will likely be kind and let you repair it. It's not like wreckages discourage rushing or even attacking because of the likelihood of losing a tank to the other team, or anything.

Quote:and weapon drop

when a engies used his remotes and he got killed he drop remote where the hell those remotes came from ???

some things are a little wierd ingame

i hope those things dissaepe in 1 of the next CP

OGFM IT GIB STRATEGEE TO TEH GAME IT NOT TEH 1337 AWESOME REALISTIC LAWL!11!

Nothing is more fun than playing with a bunch of fucktard SBHs with Ramjet Rifles. Dropping weapons defeats the point of Renegade's character system.
