ok iam not sure what iam doing wrong, but when i play games i always end up loosing connection half way torwads the end. the thing is that i enter the game, any game with a 94 ping. through out the whole game it goes back and forthe from 100. i have done everything to fix it. i lowered my graphics down and i turned up my connection speed to the highiest. not to rag on anyone, but this is bullshit. if anyone has any other ideas or thoughts it would be cool.
