The logo style is very outdated (About ten years). But the rest of the page looks like a modern template. I clicked most of the links on the site. Everything looks like a template or has a "Under Construction" page.

This "web host" is probably a couple of nopic's friends. It's not very different from Slavik's iHostingCenter. Look, there's a band website hosted. They're just experimenting with the internet.

I hope nopic and his friends are over 18 though, which they probably aren't. Look at the lower right corner-it looks like they're trying to start an "adult" network.
