Subject: Trouble with Core Patch
Posted by Spydan1 on Sun, 24 Jul 2005 07:32:54 GMT

Hi All
It's been 1 year since i've played Renegade
Now i wanne play but have some trouble with the patches..

First of all I reinstalled Renegade then updated to 1.37 then installed renguard 1.3 (first got rid of the old 1.2) then autoupdate CP1 but it won't work..
Now my Q is do i need to install SSCP 1.3 and 1.3.4 ??
to make it work?
O and if I try to install the 2 above i need to put them in the renegadeFDS ??? (or is that if you want to make a server?)

Grts Spydan1

ty btw
