Nick over at Middle-Earth Vault is reporting that German gaming magazine GameStar has run a preview of Battle for Middle-Earth 2. Apparently, the sequel will cover a part of the Lord of the Rings story only mentioned in passing in the books: the war in the North, where Sauron's forces besiege the Dwarves and the Elves.

Have a look at the pics on HdR-Inside and be sure to read the summary of the news at MEV.

Hmmm. Dwarves, Elves, Humans, Evil things. Spider-men. Buildings placed anywhere. Customizable heroes. Gee, this certainly looks nothing like a game from three years ago.
