snipefragFirst you need to go to the westwood site and download the RFDS (renegade free dedicated server) this will allow you to host a game without having to open renegade.

Then you need to go and get Blaze regulator from <http://www.blazeregulator.com> read the FAQ and set it up how it says, if you cant get it to work come back and i am sure someone will help you

Thanks. I have the RFDS just wanted to know what the other program was. I am sure I can get it set up in no time.
