Segurito wrote on Fri, 22 July 2005 16:04 Reading Comprehension = 0.01%

What tec's tried to say:

He found a bypass for renguard, after that he tried to contact RG people to "fix" it, bypass that was already fixed for what they knew, but it wasn't. He doesnt cheat like RVMECH said

"The owners of the servers running Renguard are stopping you because they choose to run Renguard to protect themselves and their clients from cheaters...basically YOU."

Im not interested in quoting or anything, if you have a problem live with it.

Tecs: "You ban me from rg when i tell you about a bypass"

WHERE YOU COULD READ SOMETHING ABOUT "HI IM CHEATING" he was trying to help RG and ren community so if you dont know how to read (i know it was hard to understand but hey, in schools they teach you how to extract the most important of a phrase right???) please just be quiet.

Warranto, try to say something and not just type being tough, if you can help good, if you just wanna start a flame war....

Looks like some of you didnt read what RenX said.

RG 1.04 will fix or "guard" the bypass so i cant understand the reason why tecs is banned

"[15:44] Message from RenGuard: You have been banned by Crimson on 21.07.2005 02:45:37 for Tecstasy: You know damn well why.. Goodbye "

Its a RG ban so he cant join RG servers... USING RENGUARD, ANTI-CHEATING PROGRAM whats the point of ban some one trying to HELP to make ren funnier to play from the net itself. Stop using RG? that would be the wrong way to go...

Seg.

u are freaking awesome seg....

as to the rest of u!

You guys are only picking on him for his typing cause u don't have anything good to bitch about. Get over it and try to focus on the issue at hand. he tried to help and ya'll were jerks about it. So its time to fix that? Ya think??? Insted of bitching about something thats done and in the past now.
