---

Ok first I am going to tell you what i got as far as patches and updates.

I have the newest Renegade upgrade and i use the Core Patch.

Now I'm going to let you know what i did.

First off, I went to [www.renguard.com](http://www.renguard.com) shortly after i clicked DOWNLOADS. Now following that i started downloading the Renguard Client from the Renguard website.

I then saved the RenGaurd\_setup\_1.03 to my computer.  
The setup was saved in the Westwood folder.

Everything went well it started downloading it finished downloading then on my Windows XP the window opened up & ask me to run the setup install wizard.

So i ran it (note it installed in under 2 seconds) following a window opened, this window. (now heres the problem now what? and how do i log on to renguard.?)
