Spoony wrote on Wed, 03 August 2005 02:40I miss him threatening to ddos our servers because we posted a conversation where he admitted to cheating. I also miss him bragging about being the best 1v1 player on Field despite his 0-15 record against me, and his constant cheating accusations every time he gets headshot. Oh, and his death threats he makes to teenagers (being in his forties himself) every time he loses an argument about a computer game, I miss those as well.

The best part about him was that his servers sucked (I get a lower ping when I host on a 36.6 modem), he had no idea wtf he was doing and he charged way to much for it. But anyways, whats wrong with threatening kids half your age over a computer game?
