AircraftkillerNightma13 what i mean is , is a 1 on 1 on the pkg first Level one your going though the mission as normal then all of a sudden the person your against comes along and hes on NOD and kills you would make it much harder

p.s. this WILL work because if you go to multiplayer practise and rotate M01 or M02 you can go to change team and your playing on nod on the single player misssions so its just the case of getting them to work online

Remember, it's Nod, not NOD.

ACK in TD it was called NOD
