Crimson wrote on Mon, 08 August 2005 15:33 Most players will find 20FPS or higher playable for Renegade. If you have an nVidia card, you'll want to download nvRefresh Tool at <http://www.nvrt.org/> to increase your refresh rate in-game to 85 which will also move your FPS's maximum to 85.

Where on that website is a dowload link for the nvRefresh Tool? I don't see one.
