Crimson wrote on Mon, 08 August 2005 13:3356k people don't lag a server.
I just can't help but reiterate that. Every time I see someone say something like that, I have to keep myself from going on and on about the exact things you've already said in your post. I even wrote a small document months ago explaining the difference between latency (ping) and bandwidth, which is a source of another common confusion.
