Ma1kel wrote on Thu, 04 August 2005 08:091.Un-install RenGaurd.
2.Download a No CD.(I recommend this one)
3.Download here a always.dbs that is patched to 1.037.
4.Reinstall RenGaurd.
5.Download CP1.
6.Download the latest scripts.dll and bhs.dll here.
7.Onlyextract scripts.dll and bhs.dll to your Renegade folder and let it overwrite the older
scripts.dll and bhs.dll.(Check if you have a scripts.dll and scripts2.dll, if you only have a scripts.dll
then rename your scripts.dll to scripts2.dll.)
8. Put your whole Renegade directory on a CD. If you have to reinstall Renegade you only have to
copy the Renegade directory to your westwood directory.

sorry if i have bumped this topic, but is scripts 212 the latest scripts to dload still? i just dloaded
them, and renegade is running faster than ever now and thank you, but is there newer ones yet?
thanx sorry 4 bumping if i did? didnt reli know were to post this :/
