Ma1kel wrote on Wed, 17 August 2005 18:22Hmm, try again. If it doesn't work then say if you have done/installed anything for Renegade lately. If you didn't do a thing it would be better to reinstall Renegade, patch it, install no-CD if wanted, install Rengaurd, install CP1. Then try to play.

But I recommend you try to run the update from the link of the ftp.westwood.com site.

OK, so I reinstalled, did the renegade auto update, installed rengaurd and I can play Renegade with no problems, on GSA. Now when I go to play on WOL, i get version mismatch:

[http://img267.imageshack.us/img267/2675/versionmismatch4uy.j pg](http://img267.imageshack.us/img267/2675/versionmismatch4uy.jpg)

Any ideas of why I get this now?
