Some of the 3d artists in this community can create some of those effects already with the current renegade.

Renegade 2 wasn't going to be anything special that would tempt anyone to part with their money, thats why it wasn't made.

If you want to see stuff like that look at the stuff we are making as far as I can tell Renegade 2 would of mainly looked better by useing the extra 'power' the average user would have from the purchase of new better computers.
