My question about the damage ratio of the Mutant Hijacker Crowbar was never answered. I wanna know if you can club the crap out of someone with that thing. Does it do more damage than the Pistol or less? Stuff like that. Clubbing people ranks really high on my list of "crap I like doing in online First-Person Shooters". Particularly in games where a knock to the head will put someone down for good.(Ah. . .that's particularly satisfying when you can do that with the Flag in Halo. . .)
