Homey wrote on Wed, 24 August 2005 03:36: Actually I found something that's pretty nasty, after getting my new video card I kept seeing a black flicker in certain areas. Well turns out whenever a sbh crosses where there is shade like near a tree it turns black as it runs through. Although I don't think it always happens. I'll see if I can get a screenshot of this, it's almost like cheating, but unintentional of course.

Just to help, I noticed that exact same thing on my new X800XL at full settings on C&C_Hourglass.mix, GDI side, by the tree on the left side of the AGT. I haven't noticed it since, but then again, I haven't played that map that often since then, either
