Ok, I know now how to change my ammunition settings to unlimited.

i have to open objects.ddb in the leveleditor of Renegade.

But now I have an other problem and that is that i need clipcount. I had Clipcount earlier today and changed it. But When I wanted to change it on an other weapon (same way) I didn't had ClipCount anymore and leveleditor changed to a new layout. While I was busy with the mod :S.

If somebody could help me than I would be very happy.

Tnx, bbtKiller
