I want to know how far some of you people need to go... I used to ride my bicycle in Los Angeles 15 miles each way to work. Driving a car on the 405 is simply retarded. I bet those fools use twice the gas every day sitting and going nowhere idle in a \$50k SUV.

I spent about 40-50 minutes on the bike each way... I passed probably about 150-250 cars a day sitting at lights on Sepulveda Blvd. while riding home. I laughed the whole way every night too. Suckers.
