I need someone for my mod to extract sounds and files from Tiberian Sun for my TS TC mod for Generals.

So if your XCC mixer actually works on your computer and you want to join the premire Tiberian Sun mod team for gen, email me at Deafwasp@genedit2k.com

You will get full access to info on the mod and first chance at everything including tests and betas.

I may not check back to this post so please use email.
