I don't see why you wouldn't like a single thing after 1997 though.

My personal Favourite album is from 2000. Tony Iommi collaborating with other artists such as Henry Rollins, Skin, Dave Grohl, Billy Corgan, Ozzy and more.

It's a truly awesome CD I suggest you buy it. It's just called "Iommi".

Well it's really like 1989 but FF7 came out and I have that OST. I hate rap, I hate rock where it sounds like the guy is having a seizure on the floor and some guy put a mic next to him.

I noticed in a lot of cases that it really reflects the person's opposite. For instance I can call my mom bitch, and we both laugh. But I can't tell Brandy that I love her. So I listen to 80's music and such, all about love and relationships. Whilst most of you listen to rap and rock because you can't freely express your anger.

It's not true in every case, but it is true more than not. Heavily true that is.
