genetix wrote on Thu, 22 September 2005 17:37I was just really lazy and started typing in this site URL when msn popped open. I accidently hit enter at the same time and got refered to this site:

www.renfor

I didn't know that was a possible DNS extension.

Oh ya, I was just in Japan and a song I heard there was Sakura... It means something like farewell and thank-you if I remember correctly.

Just seemed really weird for me after just coming back from Japan and all.

Sakura is cherry blossoms fucktard.
