Hits for playing Renegade(or probably any other game) on LAN:

- You can use same CD key on LAN with Renegade (I think that with 2 computers only)

As I have said.

Terminator 101 wrote on Mon, 10 October 2005 00:50

- You do not need to run the network setup wizard at all(it did not work on the Win98 anyway)

Yes, if only you want to play games on a LAN, but no file sharing.

Terminator 101 wrote on Mon, 10 October 2005 00:50

- You do not need a switch, crossover cable is enough(for 1vs1 for course)

Yes, however it would be less of a burden in the long run to buy a switch/router.
