Quote:1. How to install a plugin in the NR 2.0?

make sure u have NR 2.0c, and then open Source.zip in the NR directory, and edit & compile NRplugin.dll!

Quote:2. How to use msn, it has an option in it?

unfinished, does not work

Quote:3. How to make commands in it?

the current version of 2.0 is basically what ive done so far, i havnt done NRcommands.dll yet

im pretty sure it SHOULD be possible to add commands in some way or other via NRplugin.dll though?
