Ok, I am now back, and I am going to attempt to bone this beast. I will hopefully be done in a few hours, around 5:00 PM 4/28/03 (NY time).

(That skin is great. That model is alright. The center of the vehicle (the treads and the thing around it) and the left arm thingie (the missile part) needs work. The right arm looks great.)

I actually asked Madtone to make some more models, and I love it when he doesn't bone them because it gives me something to do. If you don't want to bone it yourself, then don't. We're not gullible either. We WANT to do it, it's fun.
