1.Deinstal Renguard

2.Go to Registry Editor (Start > Run > Regedit)
Search for "SVKP" and delete the folder!
(HKEY_LOCAL_MACHINE\SYSTEM\Contralset001\Service\SVKP)

3.reboot your PC

After that i Reinstalled Renguard with norton disabled.

This worked for me, i just started having the problem after Norton autoupdated.

I also Put the file in the exclusion list and i have no more problems.
