As one who has been playing since the beginning and continue to play to this day, I would say that it is definitely worth buying, especially at \$15. There really isn't any other game out there like Renegade, as most are bunny-hopping fragfests that only 12 year olds on speed can play, or just plain don't have vehicles. The only game that comes close is Battlefield 1942, but do you really have \$45 to scrape up for it?

Sure, there aren't but a tiny fraction of game servers compared to say, Counterstrike, but even so, it's a game well worth playing. You can get pieces of budget crap for \$15 that are far worse than Renegade. If you're buying this game however, you should be buying it for the multiplayer, nothing more. Singleplayer is a joke, to be generous.

Bottom line: There are worse ways that you can blow \$15.
