=HT=T-Bird wrote on Sun, 23 October 2005 20:47I found what appears to be the website for SVKP itself. It appears to be a sophisticated (2Kbit RSA + Rijndael AES) encrypting protector for applications.

Link:  
[http://www.anticracking.sk/products\\_svkp.html](http://www.anticracking.sk/products_svkp.html)

Excuse my french, but NO SHIT! As I have been saying SVKP is part of Renguard, BHS has a paid license for SVKP. It is an integral part of RG's protection.

I wish everyone would stop trying to "uninstall" SVKP, thinking it's something bad, or looking for a "clean" copy. SVKP is not infected, it is simply added to Nortons list of "hacker tools" because some script kiddies use the same protection on their viruses/trojans.
