When I used to play Renegade my pings were usually ranging from 80 to 180. That was when I had 3mb down and 256k up. I now have 4mb down and 384k up. I have not tried Renegade since that upgrade in my connection.

My FPS in Renegade is usually in the 100s. Once I get a Geforce 6800 it would probably be even higher with anti-aliasing.
