"Don't spam the radio commands!", while good, might lead to even more spamming by stupid idiots xD

"Disarm that beacon!" would be very welcome. That combined with the next would be awesome. "Beacon on the pedestal!" <- better than "Defend the pedestal" because you can say mine when you're beaconing theirs

"Rush incoming!" would be good as well...

Oh, and "Stealth unit detected!" is another good one.

Also, I like ChronoJam's idea of 'slicing up' the commands. But how would the guys without this see it? Would lead to problems probably...good idea though
