Goztow wrote on Tue, 25 October 2005 08:34 Too many people base definitions here on "what I see is what's right". That's all but true, for exemple: a "color blind" person will see red as brown. So who's right? And don't tell me that what the majority sees is the definition of what's right then...

Dont forget that colors maybe something completely different to someone else. My green maybe your blue or even closer to your red. There is no way to see what the other person is seeing. When we are young, people point to a color and say "thats green" so if infact that color is blue to you, you will never know.

Yup im aware thios has nothing to do with what you said, i just like to tell people stuff they may have never thought about.
