My new commands that i would LOVE to see would be:

Hold your fire!

Sniper spotted, watch out!

Save your money!

Stealth in base! / Spy in base! (for Nod)

Enemy rush detected!

For when only 1 person knows where the beacon/stealth/spy is:

Behind the base defences!

Near Vehicle production!

Near power plant!

Behind the Refinery!

Near the Infantry production!

There are more that i HAVE thought of, however, ive been away from the game for 2 months and i cant remember the situations.

OT: YAY! 400 posts! My new post resolution is to stop the spam!
