Logfile lines showing "crazfulla" attempting to bypass RenGuard with Cyberpunk's game2.exe.
(This is the one that worked for about 30 minutes before we fixed it)

At this point, I banned him from the network...
[06:03:16] [@Crimson]: !ban
 Several various attempts to get around the ban, including an IP change.

Note that these logs were edited to remove some private critical information about the network but
the timestamps and messages are real.

Also, RFpuppy has been banned from the network until he shares his 'bypass' with us.
